

Fuel System Check Valves

Designed for installation into low pressure fuel supply lines

- Significant cost savings over the competition
- Manufactured in both nickel-plated brass and stainless steel
- Currently used in multiple big 3 platforms.
- Precision machined
- Controlled leakage for fuel rail "bleed down"
- 100% diagnostic tested
- Multi-camera machine vision profiled
- PPM < 1
- Available in 3/8" and 5/16" for both multi-layer and molded PPA fuel lines
- Minimizes noise
